

# WEBINAR SERIES

The **Chair in Energy Sector Management** at HEC Montréal presents:

## eHighway – Electrifying Heavy Duty Road Freight Transport

Thursday, May 3<sup>rd</sup> 2018 | 1:00 to 2:00 pm (Eastern Time)

@ HEC Montréal – LIVE WEBINAR

**Guest Speaker** | **Patrik Akerman**, Head of Business Development, Siemens eHighway

**Summary** | Recent years have seen public road demonstrations of overhead contact lines technology used by hybrid and fully electric trucks in Sweden and California. More projects are being built including German Autobahns and Sweden's Transport Authority which plans to make a 30 km pilot project to advance the development of a national road map for electrified roads for HDVs. This seminar will give a background of why electrified roads are necessary, how they work and what steps and challenges lies ahead for this technology to have a significant impact on decarbonizing road freight.

**Free event** | **Registration required**
